Nevada Customized Reporting   as of March 2003

1. Do you currently generate any Ad Hoc or custom reports?
   Yes, Ad Hoc only

   If yes, please provide the following information regarding each report:

   - Specify the type of information collected in your report.
     Any data that is available in the AOSOS database for a specific reason or report. Sometimes, for example, used to validate federal report data.

   - Identify the language or software used to generate the report.
     Oracle Discoverer reporting tool.

   - Indicate whether you create a separate database for these reports or if you query against the OLTP and Warehouse databases.
     In Nevada, Discoverer reporting tool queries against the Warehouse database. Nevada does not query the OLTP because we do not want to impact the online system.

   - Identify the name and contact information of the contact person for this report.
     Louie Syrotynski (database administrator) ljsyrotynski@nvdetr.org or Susie Giurlani (primary user) sagiurlani@nvdetr.org

   - Specify the types of documentation available for this report, if any.
     None.

   - Indicate whether you are willing to share this report with other consortium states for their own use.
     Nevada only uses Discoverer for ad hoc reporting. Nevada has not developed any state specific reports.

2. Do you have any reports planned that you have not yet implemented?
   No. But, Nevada has implemented the LE100 and LE112 reports developed by NJ.

3. Name and Contact information of person preparing this survey:
   Ed Seely ejseely@nvdetr.org
